

Installation Instructions: Containment Mat

Please note our containment mats have a smooth side and a textured side. The textured side should be installed facing up. If you are installing the mat in an unheated garage in winter months, we suggest you store the mat inside for 24 hours prior to installation.

Containment mats are designed to be installed over clean and dry interior concrete. Gravel, pebbles, screws, nails and other foreign objects trapped under the mat could damage the mat. Such damage would not be covered under warranty. Prior to installing the containment mat, please make sure the surface is clean.

Remove the containment mat from the box and the bag. If you are using a utility knife to open the box and bag, be sure not to puncture the contents inside.

Unroll and unfold the mat. It may be helpful to set the mat in direct sunlight for no more than 30 minutes. While not necessary, it will help the mat relax quicker.

Position the mat just inside the garage door. We suggest leaving a couple of inches between the garage door and the front of the mat. The edging is the same on all four sides. There is no left or right and you can drive over any edge. Use a push broom to help smooth out the mat. In cooler temperatures, the mat may take longer to relax. You may continue to use the mat.

While not typical, the mat may move on some surfaces. If you have an issue with movement, we suggest securing the leading edge of the mat to the concrete using double sided carpet tape.

Cleaning Instructions

Clean the driveway or area in front of the garage door so you have a convenient place to clean the mat.

Pull the mat in such a way that the leading edge is far enough outside the garage door that moisture will not splash onto the floor.

Using a push broom or squeegee push dust, dirt and moisture over the front edge.

Use mild dish soap and water for cleaning.

Do not allow the mat to become so full that it is difficult to move.

Expert Tip. Use a wet dry vacuum to clean the mat without removing it from the garage.
